

What did you like most about the [Compendium](#)?

What can you suggest to improve the [Compendium](#)?

What makes you not want to use the [Compendium](#) or what would make you use it more?

Is there anything missing? Anything you would remove?

Could you see yourself using the [Compendium](#) in your future clinical practice?

Do you think the [Compendium](#) is more helpful as a framework to guide thinking or to print and individualize for each patient?

Do you have any other observations or comments to share related to the [Compendium](#)?

Guide Effectiveness Criteria

← POOR AVERAGE EXCELLENT →

<i>To what extent did the materials represent the following features?</i>	0	10	20	30	40	50	60	70	80	90	100
Purpose communicated clearly.											
Organized and understandable.											
Comprehensive.											
Easy to use in practice.											
Appropriate amount of time to utilize.											
Useful and practical in a clinical setting.											
Relevant to my patient population.											
Important to use with my patients.											
Customizable.											
Time or effort invested added value to my practice.
