What is mindfulness and meditation?

- A structured mental training practice that can help people with physical, psychological, or emotional distress by calming the mind and body.
- **A way to help become conscious of your thoughts and thought patterns to improve your quality of life.**

Types of mindfulness and meditation

- Two general types
 1. Guided
 2. Unguided/Silent
- **There is no research indicating that one type is better than the other. Both types are beneficial!**

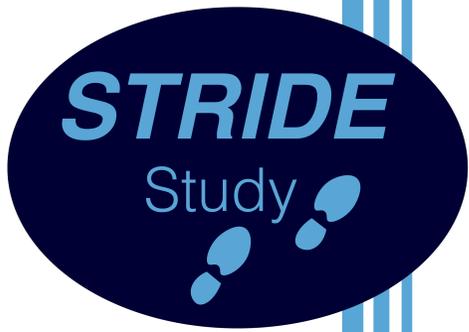

Benefits of mindfulness/meditation

- Improves sleep
- Promotes calmness
- Relieves fatigue
- Reduces anxiety and/or distress
- Helps with depression
- Reduces pain
- Improves breathing
- Lowers blood pressure

Considerations

- No negative effects have been identified
- Only “risk” is heightening emotions
- More time spent practicing = better benefits
- Takes time and guidance to develop skill
- Consistency of practice is more important than length of practice

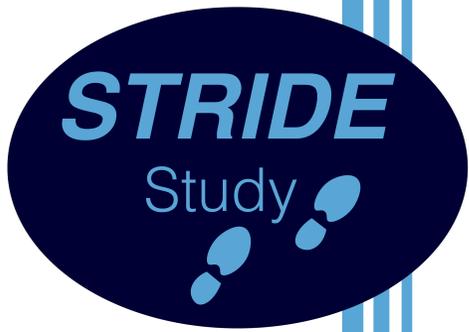

Where to access information

- Books
- DVDs/CDs
- Apps on your phone
 - Headspace (guided meditation)
 - Waking Up (Sam Harris's guided meditation)
 - Box Breathing (deep breathing meditation app)

Where to access information

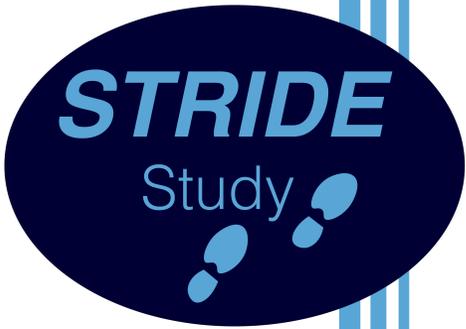

- YouTube
 - 5 min deep breathing meditation
 - <https://www.youtube.com/watch?v=vFy6Ot7eodc>
 - Meditation focusing on relaxing each body part (narrated by a PT and stroke survivor)
 - <https://www.youtube.com/watch?v=5eXIWNmt-00>
 - Meditation for you and your caregiver or family
 - <https://www.youtube.com/watch?v=tPvwzPBGGGo8>

Body position

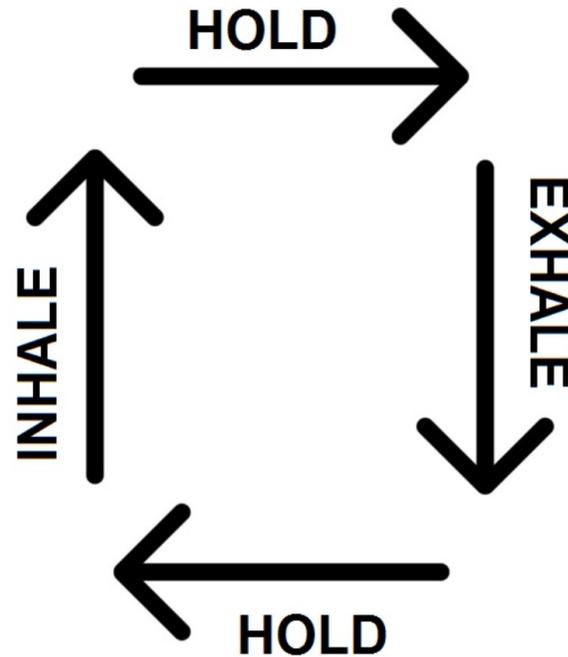

- Different Positions
 - **Sitting***
 - Can be in a chair, wheelchair, etc.
 - Lying down
 - Standing
- Posture for Sitting
 - Try to sit upright (back and neck), legs uncrossed, feet on the floor, arms and hands resting on legs or lap, eyes closed.

Let's practice

- Now we will go through a short meditation practice using deep breathing.

Review

- Mindfulness and meditation are structured mental training practices that can help you manage physical, psychological, or emotional distress by calming the mind and body.
- There are no adverse effects only many benefits.
- Posture is an important factor when practicing.
- There are many resources available. Try one today!
